

**DEPARTMENT OF THE INTERIOR****50 CFR Part 17****Endangered and Threatened Wildlife and Plants; Review of Plant Taxa for Listing as Endangered or Threatened Species**

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of review.

**SUMMARY:** The Service is issuing current lists of those plant taxa native to the U.S. being considered for listing as Endangered or Threatened under the Endangered Species Act of 1973, as amended (the Act). Such taxa should be considered in environmental planning. The present notice refines and updates three previous notices. A list is also provided of plant taxa which were previously under consideration for listing, but are presently presumed either extinct, not valid species, subspecies or varieties, or more abundant or widespread than previously believed and/or not subject to identifiable threats.

**ADDRESSES:** Interested persons or organizations are requested to submit comments to: Director (OES), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

Comments and materials relating to this notice are available for public inspection by appointment during normal business hours at the Service's Office of Endangered Species, Suite 500, 1000 North Glebe Road, Arlington, Virginia.

Information relating to particular plant taxa may be obtained from appropriate Service Regional Offices listed below:

**Region 1—California, Hawaii, Idaho, Nevada, Oregon, Washington, and Pacific Trust Territories**

Regional Director (ARD/FA), U.S. Fish and Wildlife Service, Suite 1692, Lloyd 500 Building, 500 NE. Multnomah Street, Portland, Oregon 97232, Telephone: 503/231-6131 (FTS: 8/429-6131)

**Region 2—Arizona, New Mexico, Oklahoma, and Texas**

Regional Director (ARD/FA), U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103, Telephone: 505/766-3972 (FTS: 8/474-3972)

**Region 3—Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio, and Wisconsin**

Regional Director (ARD/FA), U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111, Telephone: 612/725-3598 (FTS: 8/725-3598)

**Region 4—Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Puerto Rico, and the Virgin Islands**

Regional Director (ARD/FA), U.S. Fish and Wildlife Service, The Richard B. Russell Federal Building, 75 Spring Street, SW., Atlanta, Georgia 30303, Telephone 404/221-3583 (FTS: 8/242-3583)

**Region 5—Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, and West Virginia**

Regional Director (ARD/FA), U.S. Fish and Wildlife Service, Suite 700, One Gateway Center, Newton Corner, Massachusetts 02158, Telephone: 617/965-5100 ext. 316 (FTS: 8/829-9316, 7, 8)

**Region 6—Colorado, Kansas, Montana, Nebraska, North Dakota, South Dakota, Utah, and Wyoming (Iowa and Missouri under Region 3 after October 1, 1980)**

Regional Director (ARD/FA), U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225, Telephone: 303/234-2496 (FTS: 8/234-2496)

**Alaska Area—Area Director, U.S. Fish and Wildlife Service, 1101 E. Tudor Road, Anchorage, Alaska 99503, Telephone: 907/276-3800, (FTS: Seattle Operator: 8/399-0150; 907/276-3800)**

**FOR FURTHER INFORMATION CONTACT:**

John L. Spinks, Jr., Chief, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235-2771), or the appropriate Regional Office.

**SUPPLEMENTARY INFORMATION:****Background**

Recognizing a special need to focus on the conservation of Endangered and Threatened plants, which were first accorded the means for Federal protection therein, the Endangered Species Act of 1973 directed the Secretary of the Smithsonian Institution to prepare a report on Endangered and Threatened plant species and recommend necessary conservation measures. The Smithsonian report, published as House Document No. 94-51, included a list of more than 3,000 native taxa thought to be extinct, Threatened, or Endangered. The Service published a notice on July 1, 1975 (40 FR 27823) in which it announced that the Smithsonian report had been accepted as a petition under the terms of the Act, and that the taxa named in the report

were being reviewed for possible inclusion in the list of Endangered and Threatened species. One previous notice of review, which named four plants, had been published in April 1975 (40 FR 17612) in response to a petition. Many of these taxa were subsequently proposed for addition to the list on June 16, 1976 (41 FR 24523). Later, in 1977 (42 FR 40823) a third notice involving one plant was published. Because of the provisions of a 2-year limit for proposed rules in the Endangered Species Act Amendments of 1978 (Pub. L. 95-632), the 1976 proposal was mandatorily withdrawn in November 1979. Official notice of this withdrawal appeared on December 10, 1979 (44 FR 70796). That notice indicated that withdrawal was required because of the expiration of the deadline for making such rules final and was not related to the conservation status of the taxa proposed therein. The present notice is intended to reflect the Service's current judgment of the probable status of all plant taxa that were included either in previous notices or the 1976 proposal, as well as other taxa concerning which information has become available more recently. Taxa are grouped in several categories, as described below, in order to accurately reflect the Service's present evaluation of their status.

**Category 1**

Taxa for which the Service presently has sufficient information on hand to support the biological appropriateness of their being listed as Endangered or Threatened species. Because of the large number of such species, and because of the necessity of gathering data concerning the environmental and economic impacts of listings and designations of Critical Habitats, it is anticipated that the development and publication of proposed and final rules concerning such species will require several years. In some cases, although adequate data are now available to the Service to support re-proposal of species originally included in the withdrawn 1976 proposal, such species cannot be proposed for listing pending the receipt of sufficient new information warranting such action, as required by Section 4(f)(5) of the Act. The requirement that such re-proposals be based on new information has been interpreted to mean that such information must have been developed subsequent to the withdrawal of the original proposal on November 10, 1979. The Service requests that new information on the species named in this notice be submitted as soon as possible and on a continuing basis.

Also included in this list are taxa whose status in the recent past is known, but which may have already become extinct. These retain a high priority for addition to the list, subject to confirmation of extant populations. Such possibly extinct species are indicated by an asterisk (\*). Double asterisks (\*\*) indicate taxa thought to be extinct in the wild, but known to be extant in cultivation.

#### Category 2

Taxa for which information now in the possession of the Service indicates the probable appropriateness of listing as Endangered or threatened, but for which sufficient information is not presently available to biologically support a proposed rule. Further biological research and field study will usually be necessary to determine the status of the taxa included in this category. It is hoped that this notice will encourage such research. Some taxa included in this category are of doubtful taxonomic validity and require further taxonomic research before their status can be clarified. The fact that many of these taxa have previously been proposed and withdrawn for procedural reasons largely reflects changes in informational standards applied to listing procedures in recent years. Additional information concerning these taxa, especially that resulting from recent investigations, is particularly sought by the Service.

#### Category 3

Taxa no longer being considered for listing as Endangered or Threatened. Such taxa are included in one of three sub-categories, depending on the reasons for removal from consideration.

**3A.** Taxa for which the Service has persuasive evidence of extinction. If rediscovered, however, such species might acquire high priority for listing. At this time, the best available information indicates that the taxa included in this category, or the habitats from which they were known, are in fact extinct or destroyed, respectively.

**3B.** Names that on the basis of current taxonomic understanding, usually as represented in published revisions and monographs, do not represent taxa meeting the Act's definition of "species." Such supposed taxa could be re-evaluated in the future on the basis of subsequent research.

**3C.** Taxa that have proven to be more abundant or widespread than was previously believed and/or those that are not subject to any identifiable threat. Should further research or changes in land use indicate significant decline in any of these taxa, they may

be re-evaluated for possible inclusion in categories 1 or 2.

The plants listed in categories 1 and 2 may be considered candidates for addition to the list of Endangered and Threatened plants and, as such, consideration should be given them in environmental planning.

The Service hereby solicits information concerning the status of any of the species included in the present lists. Information is particularly sought:

1. indicating that a taxon would more properly be assigned to a category other than the one in which it appears;
2. providing new information regarding a plant previously proposed for listing and withdrawn because of the expiration of two years before a final listing action;
3. recommending an area as Critical Habitat for a candidate taxon or indicating why it would not be prudent to propose Critical Habitat for the taxon;
4. nominating for listing consideration a taxon not contained in the present lists;
5. documenting threats to any of the taxa listed;
6. indicating taxonomic revisions of any taxa included;
7. suggesting new or more appropriate common names for taxa;
8. noting errors in indicated distribution, etc.

The Service intends to consider all information received in response to this notice and to amend the contents of categories 1, 2, and 3 to reflect the current state of knowledge concerning affected plant taxa, and to indicate its intentions with regard to future listing actions. Such changes will be indicated by periodic notices in the **Federal Register**.

The following lists are arranged alphabetically by names of genera and species. Synonyms have been provided when necessary to avoid confusion. In some cases, taxa have been included which have not yet been formally described in the scientific literature. Such taxa are usually identified by a name followed by "sp. (ssp., var.) nov. ined." Known historical ranges are given by state for all included taxa.

Table 1 contains the name of all taxa presently on the list of Endangered plants. The left-hand column indicates status (E—Endangered, T—Threatened).

Table 2 contains the names of all taxa that have been proposed for listing under the Act, but for which final action has not yet been taken.

Table 3 lists all taxa in categories 1 and 2 (candidates), as explained above. The left-hand column indicates category.

Table 4 lists all taxa in category 3, with the left-hand column indicating sub-categories.

A list of genera (Table 5) is also provided, arranged by families, for cross referencing.

This notice was principally prepared by the Botany staff of the Service's Endangered Species Program in the Washington Office of Endangered species and the Service's Regional and Area Offices. The Service gratefully acknowledges the assistance of Dr. John Nagy of Brookhaven National Laboratory, Upton, New York, for extensive technical assistance in compiling the lists of taxa.

Dated: September 25, 1980.

Ronald E. Lamberton,

*Acting Director, Fish and Wildlife Service.*
